

Terms And Conditions

Please read the following Terms and Conditions("Terms of Service", "Terms of Use", "Terms") thoroughly before entering into client-service relationships with the <https://everstake.one> ("Service"). Everstake, LLC ("Everstake", the "Company", "Service", "Platform", "Us", "Our", or "We"), by and through <https://everstake.one> (the "Website"), which is running, hosting, providing staking services via validating nodes across different blockchain networks.

Once an individual accesses the Website, starts using the Website functionality or any other Everstake Service, including Our staking Platform, but not limited to, providing or submitting any information to Us, an individual is consent and agrees with these Terms of Use.

Any User of the platform("Client", "User", or "Individual"), gives an agreement to stay compliant these Terms of Use and other policies, procedures or rules imposed by the Service. Moreover, Terms and Conditions, as well as other policies, procedures, or rules, are subject to change and the Service leaves itself the right to modify them without noticing its Clients. In case you do not agree with these Terms and Conditions, you are restricted to view or use the Website or Everstake services.

Regulatory Compliance

You, as a Client, must warrant and represent that your Service usage will stay compliant with all applicable regulations and laws. You are completely responsible for understanding whether or not the Everstake Service is suitable for you in respect of such data privacy laws and regulations as GLB, HIPAA, GDPR, similar or any other applicable laws. In case you use Our Service and you are the subject to the aforementioned laws or regulations, then the Everstake is not liable if the Platform doesn't meet those required criteria.

Moreover, you take complete responsibility for any other laws and regulations in your jurisdiction whether they restrict or allow you to use such services as Everstake. Everstake is not liable for any of your actions that violate your laws in your jurisdiction through the usage of the Service.

Ownership and Intellectual Property

The Everstake owns all proprietary rights in the Service which include the domain ("<https://everstake.one>"), such marketing materials as logos, color schemes, design, and also, but not limited to, copyrights, trademarks, trade secrets, service marks, development practices, proprietary software, and other intellectual property rights. You as a Client is obligated to respect all intellectual property of the Everstake mentioned above, which are protected by law.

Use License

You are allowed to use our Service as it is provided by the Everstake LLC, without any modifications to the software or the Service that we provide. It's restricted to modify any software created by Our Company without any prior notice, and it's also restricted to extract and use source code which was created by the Everstake.

You shall not perform any unlawful actions against the Service, that may create a huge load on our infrastructure interfering the normal work of the Service; attempt to bypass or circumvent any security mechanisms, gain unauthorized access to any type of our computer systems, conduct any activities that may disrupt the work of the Service, run malicious code such as worms, trojans, cryptojacking software and other types of the viruses against the Service, including, but not limited to, computer networks or computer systems.

It's also prohibited to launch any software("crawlers", "spiders", "auto-responders") or devices on the Service, that will automatically or manually collect any data on the Website, or will spam on the Service. The "Use License" automatically voids in case an Individual violates the aforementioned rules, and shortly his/her account gets suspended. In case a User or any other individual has damaged any part of the Service due to any type of the cyber attack, then this case will be reviewed and provided to Law Enforcement which will act accordingly in this situation.

Everstake Service Provision and Termination

The Everstake provides Staking services to Client using validating nodes. The Service chooses by itself the necessary hardware and network requirements to provide a stable and efficient Staking service to Clients. Everstake holds responsibility for server maintenance, new hardware installation, or any server upgrades, software updates and covers all costs associated with these types of operations.

Everstake conducts revenue share payments based on the amount of cryptocurrency staked by the Client. The payout percentages strictly depend on the type of the staked cryptocurrency, and this information is available on the homepage of the Website under the "Available Coins" section.

Client Rights And Obligations

You as a Client of the Service must cover all applicable taxes associated with staking payouts, which may be the subject of the official taxation process in different jurisdictions. In this case, the Everstake is not responsible for any Client taxes that were imposed by different legislation systems.

If you want to initiate the withdrawal process, then you have to wait until the Unbounding Period whose length strictly depends on a particular Blockchain network. It's important to mention that you won't be able to withdraw your staked cryptocurrency before the Unbouding Period.

Privacy Policy And Cookie Policy

We at Everstake care about any information that our clients provide to us, and we store it securely while maintaining very restricted access to it. The privacy policy written below describes in a detailed way what data we collect, how we process and store it. Please note, that by visiting this website you agree with this Privacy Policy, and also we encourage everyone to open this website section from time to time to stay updated with new changes.

Information That We Collect

When You use our staking service, we may collect certain identifiable information about you, so that we could improve our service, contact you, or identify you. This information is provided during the registration process, surveys, and other activities that involve sharing personal information with the Everstake. At the moment, we collect such information as:

1. First and the last name
2. Country, City,
3. Usage Data
4. Cookies Data
5. Email
6. Phone number
7. Other

In case you get in contact with our service providing your identifiable information, it will be recorded to process your inquiry.

Moreover, we may also collect such information("Usage Data") as your IP address, identifiable browser information, the pages you visited, an action you took on our Website, unique device identifiers, and other diagnostic data.

Cookies

Everstake service may use cookies and other technologies that allow tracking and collection of some activity information. These cookies are stored locally on your device and are assigned a unique anonymous identifier and used to improve the quality of the services that you visit from marketing, technical, and product standpoints. In case you don't want us to collect any information, you can simply switch off this function in your browser settings and no cookies will be stored on your local devices nor information will be collected.

At the moment, we use the following types of cookies:

- Session Cookies.
- Preference Cookies.
- Security Cookies.

We may also use third-party Analytics providers for marketing purposes only.
Information

Security and Transfer

Our service takes the information that users provide very seriously, having different security layers that protect this information from various internet threats. While we try to provide the highest security level as possible, we cannot guarantee 100% safety of your information.

The information that you provide to Everstake may be stored and transferred across different servers located globally. It implies that you give your consent to allow Everstake transferring, storing, and processing your personal information in different jurisdictions.

Data Disclosure

We do not disclose or sell your personal information to any third parties, because we care about your privacy as well as our reputation. It is important to mention that personal information may be disclosed in the good faith belief in court or in other legal proceedings in order to protect the personal safety of the Users or employees of the Service, protect rights or intellectual property of the Everstake, and to prevent some illegal actions that may lead to negative outcomes.

Links To Other Resources

We encourage our users to stay vigilant when opening different links on our website that lead to other websites that we have no control of. When you open other websites, then you have to read their Privacy Policy, and in this case, the Everstake is not responsible for any practices and services of any third party sites.

DASH Terms And Conditions

Everstake uses its own staking pool in order for users to receive rewards from validating nodes. Basically, once validating nodes receive rewards, they are distributed proportionally to the client's stake.

At the moment we are calculating DASH payouts via the following formula:

Fractional Payment (after fees) = Reward - Everstake Fees

Definitions:

1. Fractional Payment - Staking reward proportional to the client's staked amount in cryptocurrency minus Everstake fees.
2. Reward - Actual reward for the operations of the validating nodes.
3. Everstake Fees - Fees that Everstake charges for maintenance of its activities.

Deposits

Users who want to start staking DASH with us have to create an account on our website and then register their DASH address from which they want to make a deposit to Everstake. If a client won't go through the process of registering their wallet address, then deposited amount of DASH will be returned back to an address less the network fee. Please note, members take complete responsibility for keeping their private keys safe to the addresses that they used for sending DASH.

Withdrawals

It's important to mention that all withdrawal requests are processed within 2 weeks because we use multi-signature wallets and all requests to withdraw funds are collected and then processed altogether for all users. We have implemented such a security strategy to reduce the number of times the private keys are used to open our cold storage, so in this way, we ensure the protection of users' digital assets.

Payouts And Fees

By the end of every month, we distribute all rewards received by our validating nodes proportionally to the amount of users' staked cryptocurrency and their staking period. Moreover, there are no time restrictions for staking so that users can stake DASH anytime regardless of the payout date. For example, if a client staked cryptocurrency one week before the payout date, then they will receive the corresponding amount of rewards following a one-week time frame.

All clients who staked cryptocurrency with Everstake have to cover a 15% fee from rewards they receive for the services that we provide. These fees are subject to change.

Taxes

If jurisdiction where you reside demands to cover taxes on any revenues received from cryptocurrencies, then it's your sole responsibility to cover them. Everstake is not responsible for any fees, duties, and other charges imposed by different jurisdictions.

In case you staked cryptocurrency with Everstake, you become automatically bound to this agreement and responsible for any taxes, duties, and charges.
